What sets KLapper apart?

Surface intelligence from your Firm's data via "intelligent" connectors:

KLapper "GenAI-powered virtual assistants" can be built within seconds, trained with knowledge from NetDocuments / iManage DMS, SQL Server, Time and billing data, Experience data, CRM data, SharePoint Intranet, Network & Online web sources, and any modern web application like "ServiceNow", "Intapp", "LexisNexis", "Foundation" etc. (with microservices connectivity).

Secure Installation:

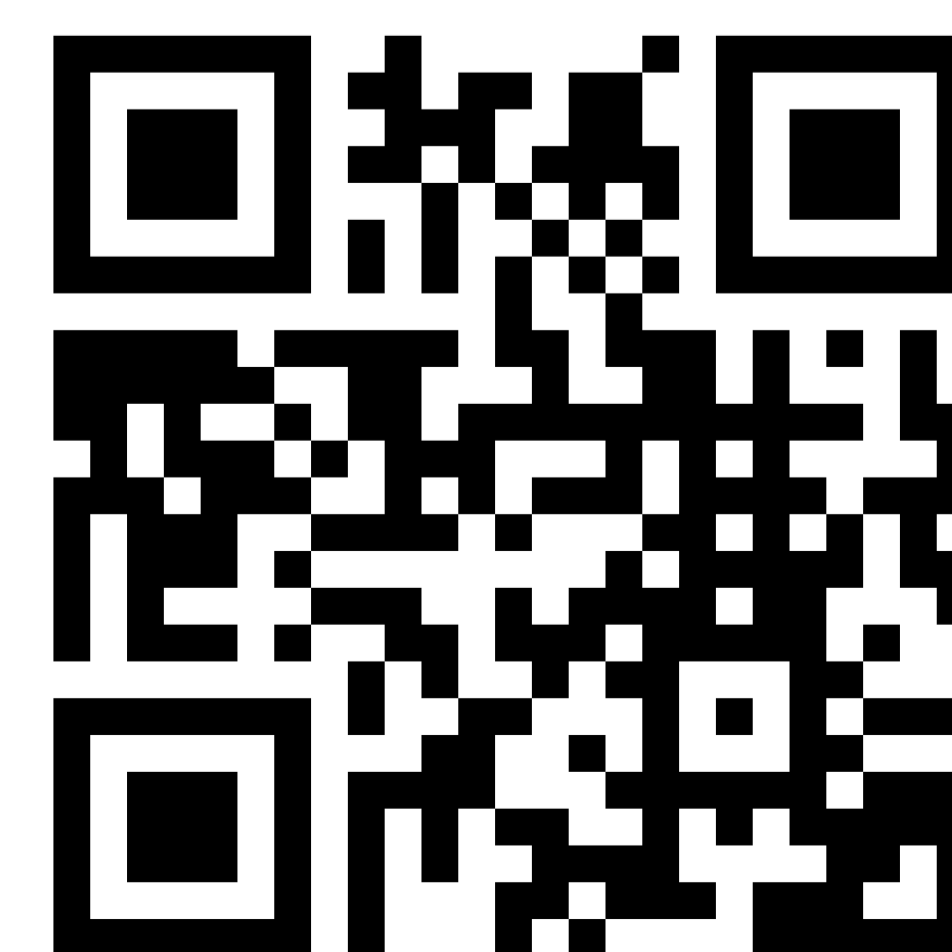

KLapper can be seamlessly installed within your firm's Microsoft Azure Tenant, ensuring utmost privacy, confidentiality, and security for your valuable data.

Usage-Based Licensing Model:

Users can benefit from a flexible and cost-effective usage-based licensing model, allowing them to scale their virtual assistant capabilities as needed with minimal up-front costs.

KLapper Assistants offer a streamlined 1-click deployment process, making them effortlessly accessible across a wide range of platforms, including Microsoft Teams, SharePoint Online (as an app or Guided Search extension), websites, mobile apps, and Windows 11.

Enhance the Microsoft Copilot experience using intelligent KLapper Plugins for Copilot

Users can enhance their Microsoft Copilot experience and empower users by integrating intelligent KLapper Plugins that provide robust data insights directly within Copilot.
